Amira/Amira **Verification** Workflow

Noise reduction

- Gaussian, Median, ...
- Anisotropic diffusion
- Non-Local Means
- Deconvolution

Background correction

- Flatfield
- Shading correction
- Block-Face correction

Image artefacts reduction

- Curtaining
- Pore-back / shine-through

Fiber Analysis via Segmentation (Most Likely Impossible)

Fiber Analysis via Segmentation (Most Likely Impossible)

Cylinder Correlation

- Correlation-based detection
 - Correlation map
 - Orientation map

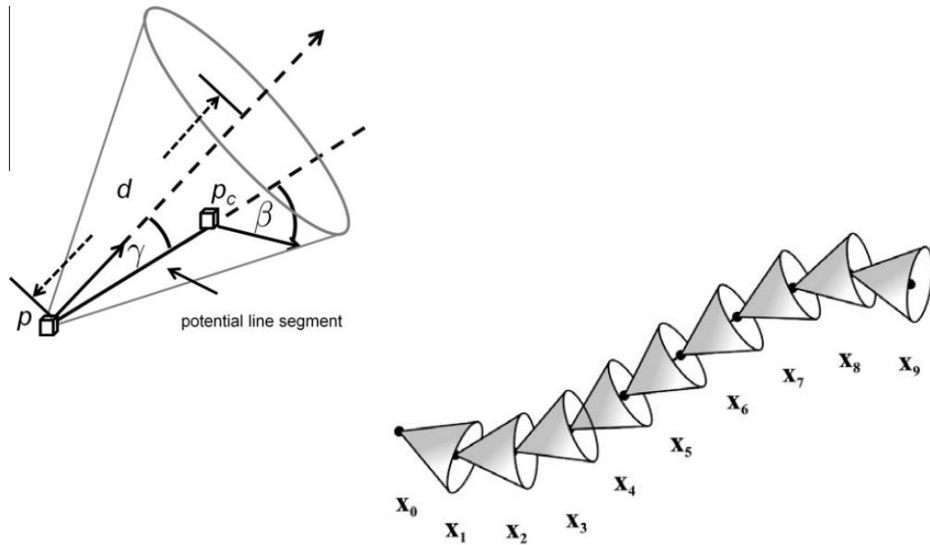

Avizo[®] Inspect

Avizo[®] Inspect

[Roseman et al., Ultramicroscopy 94, 2003], [Rigort et al., J. Structural Biology, 2012], [Weber et al., JSB, 2012]

Correlation lines tracing

- Fiber centerline tracing
- Iterative fiber extraction

[Roseman et al., Ultramicroscopy 94, 2003], [Rigort et al., J. Structural Biology, 2012], [Weber et al., JSB, 2012]

Cylinder Correlation - Result

Cylinder Correlation - Result

Cylinder Correlation - Result

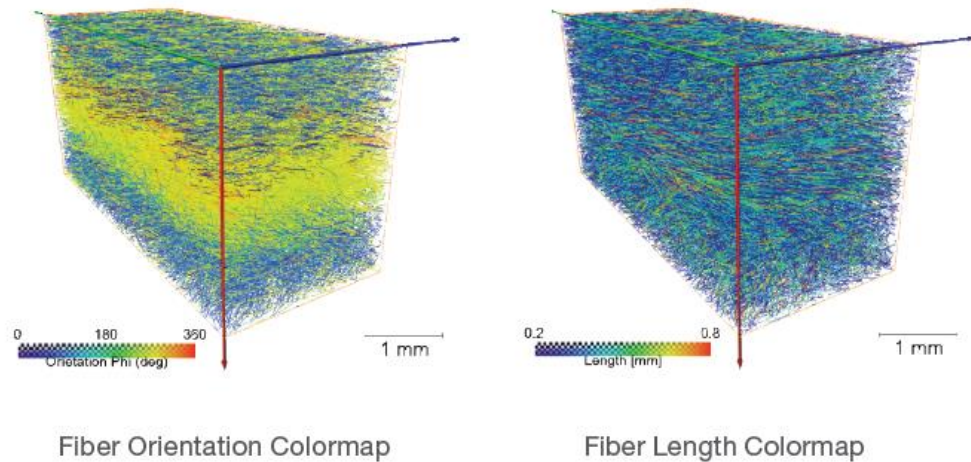

Fiber Verification

Single Fiber Extraction From CT Image

Tracing and Visualization of Each Fiber

Measurements for Quantitative Analysis

Each Fiber

- Length
- Orientation
- Diameter
- Volume
- Surface Area
- Tortuosity...

Full/Sub-Volume

- Total Fiber Volume
- Total Fiber Surface Area
- Orientation Tensors
- Main Orientation Vectors
- Fibers Density...

- Simulation Vs Actual
- Single and Multiple Layers
- Improve Simulation for more accurate predictions
- Export data to other software

Split Volume to 12 Layers

Fiber Verification

Full-Volume Analysis

Layer #	Coordinate X [mm]	Coordinate Y [mm]	Coordinate Z [mm]	Volume [mm ³]	Fiber Count	Average Length [mm]	Standard Deviation [mm]	Orientation X [deg]	Orientation Y [deg]	Orientation Z [deg]
1	0.000000	0.000000	0.000000	0.000000	0.000000	0.000000	0.000000	0.000000	0.000000	0.000000

Layerwise Volume Analysis

Distribution of Mean Length

Analysis Report for Each Fiber

Visualization of Orientation Vectors

Distribution of Length

Visualization of Density of Fibers

Distribution of Orientation Tensor
Trend Analysis of fiber orientation in core and skin layers under injection molding

Fiber Analysis Use Cases - Datasets

- CFRP Bike 0.27 μ m

- Mask Filter Fiber 1.07 μ m

- CFRP 1.25 μ m

Avizo®

Fiber Analysis Use Cases - Results

- CFRP Bike 0.27um
- Color by Orientation
- Defect ID

- Mask Filter Fiber 1.07um
- Color by Tortuosity

- CFRP 1.25um
- Color by length / orientation

Color by Length / Tortuosity

Color by Length / Tortuosity

- Contact points and local orientation

Fiber and Porosity Analysis

Avizo

Removing binder material

Avizo

Successive removal of separated and quantified grains

Avizo

Fiber reconstruction through cylinder correlation
(Fibers and porespace here have same x-ray absorption)

Avizo

Removal of reconstructed fibers

Avizo

Porespace is replaced by pore network model

Avizo

Adding binder material

High Performance Meshing / 3D Printing

Direct meshing from segmentation data

- High Quality and Fast mesh generation
- Fine control over cell size distribution
- Dedicated intuitive Meshing Workroom
- Complete set of exporters: Abaqus, Ansys, Fluent and more.

X-ray Synchrotron Nickel foam

(new in Avizo 9.4/ Amira 6.4)

Displacement and Strain maps from 3D images during in-situ experiments

- Innovative, powerful, contact less, bulk-strain measurement technique
- Evaluate material response to mechanical or thermal loads, fatigue tests
- Local and Global estimation methods

Avizo XVolumeCorrelation Extension has been developed in cooperation with the companies 3Dmagination (Didcot, UK) and Eikosim (Paris, France).

Snapshots of any size

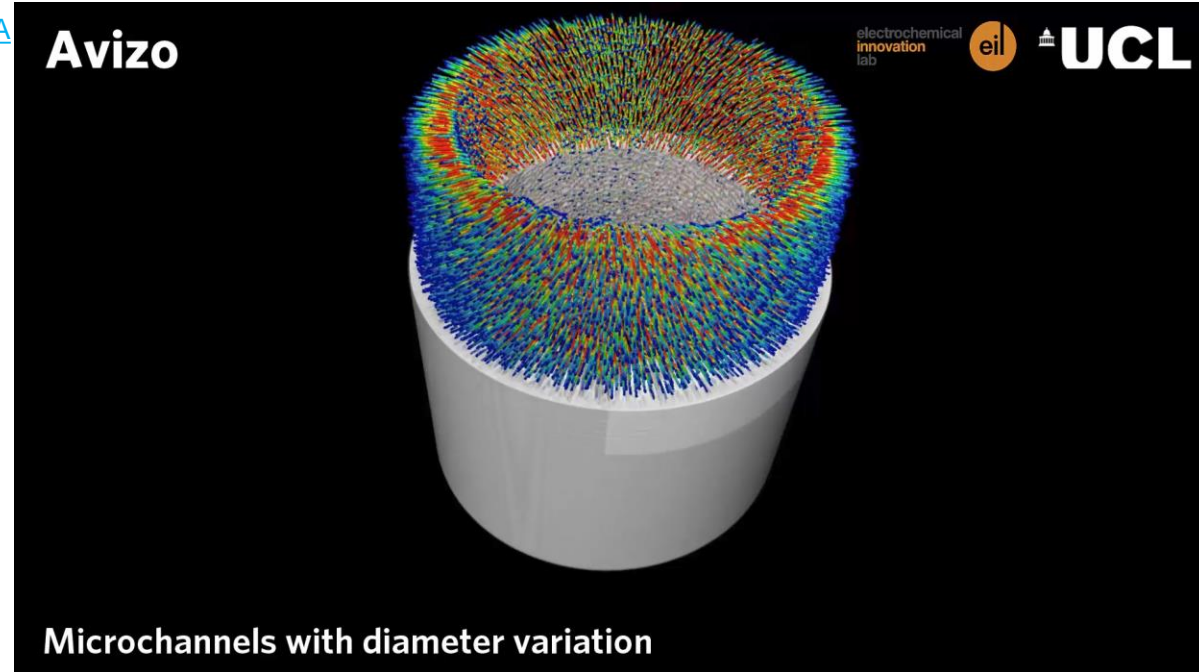

- Not limited to screen resolution

Easy animations and videos

- Create your own scenario
- Intuitive interface for generating animations

3D Stereo devices

- Display your data in real 3D
- Flat walls of any size
- Immersive environments
